PROFESSIONAL SUMMARY

AI Agent Developer and RPA Developer with 5+ years of experience building intelligent automation and enterprise AI solutions using Microsoft Copilot Studio, Azure AI Foundry, Power Platform, and Python. Specialized in designing AI agents, RPA workflows, and end-to-end automation pipelines integrated with Azure AI Services, SharePoint, Dataverse, and REST APIs. Skilled in prompt engineering, web scraping, machine learning, and cloud platforms (Azure and AWS), with a proven record of driving digital transformation through scalable, AI-powered solutions.

TECHNICAL SKILLS

AI Agents & Automation: Microsoft Copilot Studio, AI Agents / Intelligent Agents Development, Power Automate (Cloud & Desktop Flows / RPA), Prompt Engineering, Web Scraping

Microsoft Power Platform: Power Apps (Canvas & Model-Driven), Power Automate, Power BI, Dataverse, Dataflows, Power Fx, AI Builder, Custom Connectors

Microsoft Azure & AI: Azure AI Foundry, Azure AI Services (Document Intelligence, AI Vision, OpenAI), Azure Functions, Azure Logic Apps

Development & Integration: Python, REST APIs, SQL / DBMS, SharePoint, Microsoft Graph API, Microsoft Teams, Dynamics 365, AWS Cloud Services, Machine Learning

PROFESSIONAL EXPERIENCE

RPA Developer II / AI Agent Developer

Dec 2025 – Present

Hollister Incorporated (Full-time)

- Design and develop AI-powered automation solutions combining RPA, Microsoft Copilot Studio, and Power Platform to solve complex business challenges.
- Build and deploy intelligent Copilot-based AI agents to streamline enterprise workflows, enhance decision-making, and improve operational efficiency.
- Engineer end-to-end automation pipelines for data ingestion, processing, and visualization using Python, Power Automate, and cloud platforms (Azure / AWS).
- Collaborate with cross-functional teams to deliver scalable solutions and drive digital transformation through AI, ML, and enterprise automation integration.

Microsoft 365 Administrator / Power Platform Developer

Aug 2023 – Aug 2025

Areness

Gurugram, Haryana

- Architected and deployed enterprise-scale automation using Power Automate Desktop (RPA) and Cloud Flows, reducing manual effort by 60–80% across business processes.
- Developed Canvas and Model-Driven Power Apps with complex business logic, integrating with Dataverse, SharePoint, and external systems via Microsoft Graph API and custom connectors.
- Implemented AI-enhanced applications using Copilot Studio for conversational interfaces and AI Builder for intelligent document processing and form recognition.
- Integrated Azure AI Services (Document Intelligence, AI Vision) within Power Platform solutions for advanced OCR, data extraction, and cognitive capabilities.
- Orchestrated end-to-end automation lifecycle (design, development, testing, deployment) following DevOps best practices, and led code reviews and performance optimization.

IT Engineer

Jan 2021 – Apr 2023

KIPM

Gorakhpur, UP

- Developed Power Platform solutions for academic and administrative process automation, including Canvas Apps integrated with SharePoint and SQL databases.
- Designed automated workflows with Power Automate Cloud Flows for data synchronization and business process automation.

- Built interactive Power BI dashboards for data visualization and decision support; managed solution lifecycle from requirements gathering through deployment and maintenance.

KEY PROJECTS

AI-Powered Resume Screening & Fitment Analysis Agent

Copilot Studio, Power Platform, AI

- Designed a conversational and autonomous AI agent on Microsoft Copilot Studio to automate resume screening and candidate fitment analysis against Job Descriptions.
- Enabled multi-channel resume ingestion via SharePoint and Copilot Studio; implemented AI parsing to extract name, contact, skills, experience, education, gaps, and certifications.
- Developed JD-based fitment analysis with fitness score (%) prediction, auto-updating extracted details into Excel; built autonomous post-upload workflow with daily scheduled updates and Q&A capability for recruiters.

Marketing Insights Tool

Power Platform, Copilot Studio, Power BI, Salesforce

- Built an AI-powered insight management solution that converts unstructured frontline notes from Salesforce, Chatter, and account comments into real-time business intelligence for leadership, marketing, and commercial teams.
- Reduced manual analysis time from 120–240 minutes to ~10 minutes, enabling faster strategic decisions; delivered enhanced competitor risk visibility and reduced duplication of effort across teams.

IBPedia – SAP IBP Knowledge Agent

Copilot Studio, Power Automate, Excel, AI

- Developed an autonomous AI knowledge management agent that processes incoming emails and continuously updates an SAP IBP knowledge base stored in an Excel Q&A table.
- Implemented intelligent email analysis with relevance detection and duplicate identification to filter signatures, greetings, and irrelevant noise, ensuring only new SAP IBP-related information is added.
- Automated generation of clear, searchable questions and precise answers derived from email content, with structured output rules and robust failure handling.

Enterprise Process Automation Suite

Power Automate, Azure AI, Dataverse

- Orchestrated automation using Power Automate Desktop for repetitive tasks and Cloud Flows for end-to-end process automation across business workflows.
- Integrated Azure AI Document Intelligence for automated data extraction from 500+ invoices weekly with 95% accuracy, eliminating manual data entry.
- Implemented advanced data modeling in Dataverse and designed automated approval workflows with conditional logic and exception handling via Microsoft Graph API.

AI-Powered Business Card Data Extractor & HRMS Automation

Power Apps, AI Builder, Power Automate

- Developed Canvas App with AI Builder for automated contact extraction from business card images with 98% accuracy, reducing manual data entry time by 85%.
- Engineered HRMS Canvas App with geofencing and Model-Driven App with multi-level Teams-integrated approval workflows and custom connectors; reduced payroll processing errors by 60%.

HR & IT Conversational AI Agent

Copilot Studio, Teams, AI

- Designed and deployed an AI-powered chatbot using Copilot Studio for intelligent HR and IT support, integrated with Microsoft Teams and Graph API for seamless access and ticket management; reduced support resolution time by 50%.
